ABSTRACT

A speedometer (~~32~~), a fuel gauge (~~33~~), an odometer (~~34~~), left and right turn indicators (~~35L and 35R~~), and an ignition indicator ~~36~~ are arranged in a meter panel (~~31~~) of a meter unit (~~30~~). An IC tag (~~40~~) into which an ID code in standardized data form is registered is installed on the back surface of the meter panel (~~31~~). The IC tag (~~40~~) is resin molded and is installed on the back surface of the meter panel (~~31~~) made of resin. The mold resin and the meter panel (~~31~~) are both made of a resin material having transmissivity to electromagnetic waves. Information is wirelessly transferred to and from the IC tag, and may be managed using a data management system.
